### Abstract

Rooted in Renaissance harmony and feminine myth, the Flora Sconce from the Muses Collection transforms reflection into a site of empowerment.

Inspired by Botticelli's Primavera, Goti uses Venetian glass techniques - layering and silvering - to blur transparency and matter.

The work bridges the ancient and futuristic, reimagining identity and ornament through a powerful female lens.

Designed by the artist and made by Vetrulia artisans exclusively for Todd Merrill. For any enquire contact [info@toddmerrill.com](mailto:info@toddmerrill.com)
